

# TAM: Bridging the Global AI Access Gap

Line overlay tracks >=4GB RAM owners rising from ~500M today to ~1B+ by 2030.

Sources: GSMA Mobile Economy 2025; ITU Facts & Figures 2024.

## The Opportunity

~500M addressable users today own >=4GB RAM phones but are data-poor.

## The Barrier

In South Asia & SSA, 1GB of data still costs 5-10% of monthly income.

## The Solution

Offline-first architecture saves 50-80% of data costs for the next billion users.
